AND/OR rubber cork

Art Exhibit • Photography: Courtesy of Consolidated Carpet, New York, NY

AND/OR rubber cork

USA made AND/OR is a unique blend of rubber granules and cork. For floors, AND/OR offers slip resistance, sound absorption, comfort under foot and durability; vertically, AND/OR can be used as a wall covering, tackable surface or to wrap structures or columns. With natural cork content, shade variations are possible.

Thicknesses: 3.2, 4, 6, 8 mm

Formats: 4' wide Roll & 2' x 2' Square edge tile

AND/OR requires finish coats for all flooring installations (including fitness areas), wall installations below chair rail height and floor to ceiling installations. Finish coats on tackable surfaces are optional.

Meridian Redwine, Atlanta, GA
