

Hotel Suites, Park City UT

Eco-Clicks Cork Cable is installed in hotel suites in Park City, UT. An excellent choice for flooring in the suites, Eco-Clicks Cork Floating Floor offers a glueless interlocking flooring system that combines cork flooring with a high density core and a cork backing. With good acoustical qualities, Eco-Clicks Cork is finished with a water-based urethane that is resistant to wear, impact damage and scratching. Offered in 15 standard colors, the Eco-Clicks Cork plank size is 12" x 36"(nominal) x 10.5 mm.

Cork is made from the bark of the cork oak tree. It is natural, durable, quiet and comfortable. With a proven flooring history dating back to the early 1900s, well maintained cork floors are able to last decades.

Floating floors are suitable for use in many commercial and residential areas and can be installed on, below or above grade over a variety of substrates. As the name implies, floating floors "float" as a unit with expansion spaces necessary. Floating floors do not require adhesive which allows for immediate usage after installation. Capri offers coordinating accessories to be used with Eco-Clicks cork.
