

## Eco-Clicks Cork: floating floor planks

- Constructed on the Uniclic system, Eco-Clicks Cork top layer is 3 mm pre-finished cork; middle layer is 6 mm moisture resistant HDF board with an edge sealing system and bottom layer is 1.5 mm cork underlayment with antibacterial protection.
- Plank size: 12" x 36" (nominal) x 10.5 mm. All patterns are random and not intended to match or line up.
- Like all natural wood, cork has shade variations. Attention to blending shades when installing is necessary. UV rays will fade natural wood including cork. Cork does not include any Red List ingredients.
- Floating floors are suitable for use in many commercial areas and can be installed on, below or above grade over many hard surfaces. As the name implies, floating floors "float" as a unit with expansion spaces necessary.
