Expressive floors™

Who We Are

LSI Floors makes high quality luxury vinyl tiles and planks for public spaces. The product is about color, texture, pattern and a factor of “cool”. Our patterns range from the warmth of wood planks and stone, through nature images of water and sand, to inspirational designs such as Tread Plate and Cow.

LSI is a no-wax product with extremely low maintenance. We have been making vinyl flooring for over 20 years and back it with a 10 year commercial wear warranty.

Our slip resistance is unsurpassed and actually gets better when the product is wet.

LSI has the ability to customize product with digital imaging, precision cutting or simply custom sizing of tiles.

Our flooring is all completely recyclable and supports 2 LEED credits; one for recycled content and the other for indoor air quality.

Benefits of LSI Vinyl

LSI vinyl flooring is durable, impervious to water, resists stains, is simple to maintain and disinfect, while easily carrying the load of heavy equipment. The dimensional stability built into each LSI tile and plank ensures the product will not shrink and comfortably lives up to the life-cycle of any public space. For these demanding environments LSI has engineered the surface of the product to include anti-slip technology.

Tiles and planks create visual interest and realistic formatting mimicks the natural materials reflected in the designs.

Engineered to last

All LSI floors are engineered to withstand the rigours of daily traffic, whether it's a busy corridor, a classroom, retail environment, or a night club. Manufactured with five layers of construction, our floors are built to last the lifetime of any project. Our UV-cured microscopic glass bead top surface is the latest in slip-resistance technology. Not only does it make our floors safer, they're also virtually stain-proof and easier to clean and maintain.
