Custom floors

vinyl flooring designed with you in mind

Expressive floors™

Custom floors

In the **Imagination Studio** each new creative idea can be brought to life. Whether it's a company logo, unique pattern, or floor mural with the image of your choice, LSI Floors can turn your ideas into high performance luxury vinyl flooring.

Precision machine cutting

Straight lines, geometric shapes, or designs as intricate as corporate logos, all of these ideas can be captured by state-of-the-art cutting tools utilized by LSI. These highly precise tools move easily around curves producing very clean, straight edges and ensure a seamless visual. All of the high performance qualities of the flooring are maintained.

Once the pattern has been cut, it is reassembled into square tiles and the surface covered with a peel-able film. Standard installation methods are then used to lay the floor. With the product down, the film is peeled back to reveal the bespoke design.

Additional capabilities:

Digital printing of unique designs

- non-repetitive images; mural, logo, large scale graphic

Reinterpreted LSI product

- recoloring of solid or pattern
- alteration in tile or plank size
- modification to surface texture

Performance

All LSI floors are engineered to withstand the rigors of daily traffic, whether it's a busy retail environment, a commercial office building or a night club. Manufactured with five layers of construction, our floors are built to last the lifetime of any project. Our UV cured microscopic glass bead top surface is the latest in slip-resistance technology. Not only does it make our floors safer, they're also virtually stain-proof and easier to clean and maintain!
