

Who we are...

Here it is in a nutshell.

LSI Floors makes high quality luxury vinyl tiles and planks for public spaces. The product is about color, texture and pattern. Our patterns range from the warmth of wood planks and stone, through nature images of water and leaves, to Finger Print and Cow.

We are a no-wax product with extremely low maintenance. We have been making product for over 20 years which is longer than our 10 year warranty.

Our slip resistance is unsurpassed and actually gets better when the product is wet.

LSI has the ability to customize the product with digital imaging, water jet cutting or simply custom sizing of tiles.

Our products are all completely recyclable and support 2 LEED credits; one for recycled content and the other for indoor air quality.

We also have our unique healthcare line with all of the anti-microbial and anti-bacterial qualities required in these specialized facilities.

Advantages:

Durability

- LSI flooring carries a 10 year commercial wear warranty and a 1 year manufacturing defect warranty
- 5 layer construction in Expressive floors™ / 6 layer construction in Protective floors™

Slip resistance

- LSI's UV cured microscopic glass bead surface is the latest in slip-resistance technology helping to prevent slips and falls
- This surface improves the tile's slip resistance when it counts most - under wet conditions

Infection control

- micron-size silver particles are built into the top surface and backing of the product. This natural element inherently reacts to bacteria safely and effectively inhibiting its growth

Indentation resistance

- LSI's product is engineered to withstand heavy rolling loads exceeding requirements for public spaces and healthcare facilities

High resolution imaging

- a superior printing process affords LSI flooring a photo realism that can trick any eye

Ease of maintenance

- simply clean with a damp mop and mild soap
